DETAILED ACTION

Response to Amendment

1. In response to the Amendment received on January 8, 2004, the examiner has carefully considered the amendments. The examiner acknowledges the cancellation of claims 16-17. .

Response to Arguments

2. Applicant's arguments, see Amendment, filed January 8, 2004, with respect to claims 1-18 have been fully considered and are persuasive. The rejection of claims 1-3, 5-6, 8-9, 11-15, and 18 under 35 USC 102(b) as being anticipated by La Bassi et al (EP 0 386 650 A2 and US 5,168,087) has been withdrawn. The rejection of claim 7 under 35 USC 102(b) as being anticipated by or, in the alternative, under 35 USC 103(a) as being unpatentable over La Bassi et al (EP 0 386 650 A2 and US 5,168,087) has been withdrawn. As pointed out by applicant La Bassi et al does not teach a dispersion, which is a liquid/solid system, but teaches mostly suspension systems, which is a liquid/liquid system. While La Bassi et al teaches using 2,4,6-trimehtylbenzoyl diphenylphosphine oxide in example 9 in an aqueous dispersion, La Bassi et al does not teach grinding said dispersion to obtain a suspension having a particle size of less the 12 mm. Therefore the examiner deems that La Bassi et al does not expressly teach and/or fairly suggest an aqueous, storage stable, non-sedimenting suspension as claimed by the instant invention.

Allowable Subject Matter

3. Claims 1-15 and 18 are allowed.
4. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance is the limitation specifying that the aqueous, storage stable, non-sedimenting suspension has a particle of less than 12 mm.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
